- Korea Smart Card Co\_Job Requirement\_Thailand.pdf (103 KB)

Dear IAD,

My name is Jae Park, Sales Representative of Korea Smart Card Co. I am glad to write to IAD, Kasetsart.

Currently we are looking for some student interns who can work for our project in Thailand. The person could work in Malaysia or Korea which there are our companies.

We got the recommendation of Kasetsart University from a Korean University which we have a good relationship in Korea. (Kookmin University) We got a strong recommendation of KU from them who has a exchange student and internship program with you. So we were glad to contact you.

It will be very appreciated if we can have some chances to work with Kasetsart student. I was trying to contact with other institute or faculties. However, IAD could be the right channel to contact for the first step as I discussed with Khin Supawadee by phone call.

Please check how we can find the student who are interested. We want to start the work as soon as possible, and some requirements in the attachment could be adjusted with the candidate. So please make them feel free to contact.

If you need any other question, I could visit IAD or discuss by phone, in case I left my Line ID 'alfenhime' (sorry that I do not have Thai number now).

Thank you for your cooperation.

Best regards,

=====

## 1. Company Introduction

- Korea Smart Card Co., Ltd (KSCC) was established in 2003, provides reliable and sophisticated smart card technology for unified fare collection system with nation-wide interoperability. It covers the integrated mass transportation network in Seoul, 15 other cities in Korea and several other cities abroad.

KSCC is expanding its business area from public transport payment system to e-money system for retails. KSCC is taking a multi-lateral approach with AFC Consulting, AFC Acquiring, and AFC Product Sales so that the services we provide can cater to every business partner's distinct need.

KSCC signed the contract with Office of Transport and Traffic Policy and Planning (OTP) in Bangkok, Thailand and currently involved with Program Management Services (PMS) where KSCC Provides transportation related consulting service.
